ASX RELEASE [ASX:EUM]

ACTIVITIES REPORT

SEPTEMBER QUARTER 2012

HIGHLIGHTS

- The September quarter saw Eumeralla Resources Ltd (EUM) and Myanmar incorporated Southern World Mining Co Ltd. (SWM) sign a non-binding letter of intent (LOI) to jointly explore tin and tungsten licences in Southern Myanmar's historical Tenasserim region.
- Upon binding contracts being executed with SWM, one licence will transfer a percentage of the mineral rights to EUM. In addition, the JV is finalising negotiations on securing three additional large scale exploration or mining licences in the tin and tungsten belt in southern Myanmar.
- Myanmar based SWM specialises in identifying large scale, quality resource assets in the region. EUM will utilise SWM's extensive regional geological expertise to assist in identifying the three additional large scale exploration licences. EUM expects the four large scale licences to total approximately 4,000 acres.
- These four licences will give EUM approximately 4,000 acre footprint in an exciting region which is well recognised for its historical Tungsten, Gold and Copper production.
- The southern regions of Myanmar include areas belonging to the South East Asian tin belt. This belt includes parts of Indonesia, Malaysia and Thailand and at times produced 65 per cent of the world's tin and the largest percentage of the world's tungsten.
- The current agreement is non-binding and subject to due diligence. The Directors of EUM expect binding legal documentation and due diligence to be completed shortly.

CHULUUN KHOROOT TUNGSTEN PROJECT

The Company has signed a contract to provide initial mapping, sampling and surveying of its licencesite in Northern Mongolia, ahead of commencing a drilling program. The License covers an area of 12,657 hectares and incorporates the historical Chuluun Khoroot tungsten mine which was active during the period 1945-195.

About Eumeralla Resources Ltd

Eumeralla is an emerging ASX-listed (ASX:EUM) metals explorer. The Company was incorporated on 19 January 2011 for the primary purpose of acquiring and exploring mining projects in Mongolia with the aim of discovering commercially significant minerals deposits. The License covers an area of 12,657 hectares and encompasses the historical Chuluun Khoroot tungsten mine which was active during the period 1945-1955. The License area is located in north-eastern Mongolia approximately 20 km north of the town of Dashbalbar, 850 km north-east of Ulaanbaatar and 85 km north-west of the Soloweysk-Choibalsan railway. The Company's initial metal focus will be on tungsten, although other commodities may be targeted in the future. In addition, EUM is constantly assessing other projects in Mongolia and other SEA countries with a view to scale up and add value to shareholders

Field work commenced during the last quarter and exploration drilling is planned to commence once samples have been evaluated.

During July, approximately 300 samples were collected. The total cost of the mapping and sampling is estimated to be USD 80,000.

MYANMAR PROJECTS

The company is currently engaged in advanced talks with several other parties holding tin and tungsten exploration licences and hope to conclude these agreements in the short term.

EUM's directors continue to be encouraged by political and economic developments in Myanmar and believe that the lack of exploration over the last 30 years combined with favourable geology make the country highly prospective for tin and tungsten.

Yours faithfully

Michael Hynes
Director / CEO
